

## ShareFest Waco 2008 Project Descriptions

### **Lake Air Middle School**

They have an area outside the library that needs to have weeds pulled and flowers planted. This is a small project.

### **Hillcrest PDS**

A storage building needs to be completely cleaned out and then have a shelving system installed. Once the items are cleaned out, they will be sorted, organized and put back in, which could take some time. In talking with the principal, she thinks this will be a pretty big job that needs to be done in the day allotted.

### **Provident Heights Elementary**

They have a garden that needs to be weeded and cleaned out. Their pond needs to be drained, cleaned and then refilled, and all of their beds need to be weeded and have the winter leaves raked up and put into trash bags. Mulch would then need to be spread into all the cleaned bed areas.

### **Lake Waco Montessori**

General weeding of the campus beds and grounds. Place new mulch in the beds. They also have a green classroom that has four rectangle beds that need to be cleaned out to prepare them for planting. Look for any other general pruning or grounds cleanup that may be needed. Need to bring cultivators, hoes, and shovels. A wheelbarrow or two and buckets will also be needed. Volunteers should have gloves and eye protection as needed.

### **STARS Campus**

They need some trim painting of doors and windows. They also need front and back flower and garden beds cleaned up and weeded with a fresh layer of mulch and some flowers.

### **North Waco Elementary**

Clean up of dead shrubs and clean up of the grounds and their garden area, all of which are in pretty bad shape. After the clean up, they want to plant flowers and replacement shrubs. They also have a pond that they would like cleaned out and refilled with water.

**North Waco Backyard Bible Club**

Host crafts, snacks, bible story time, music, and games for North Waco Neighborhood children. Afternoon activity.

**Friends For Life (16-20 individual yards)**

Each yard belongs to an elderly person or couple. Their yard would need to be cleaned up and then mowed and then any other general maintenance of the flower beds they have. Some of the yards still have leaves that need to be raked up. There may be limbs and yard debris that needs to be hauled to the curb for bulk trash pickup.
